

The Light Source Tent Beam Clamp

Half-Inch Slot Tent Beam Clamp

The half-inch slot Tent Beam Clamp fits smaller tent free-span tent beams with a one-half inch slot in the bottom the tent beams. The Tent Beam Clamp is designed to be used on diagonal tent roof support beams and vertical tent posts with 1/2" slots. The half-inch slot tent beam has a one-piece, zinc-plated steel central shaft with a half -inch by one inch crossbar, a central threaded portion to secure the clamp to the beam, and a 1/2"-13 TPI threaded socket on the bottom of the clamp. There is a knurled ring on the internally threaded aluminum collar that is rotated to secure the tent beam clamp to the tent beam. The Tent Beam Clamp is rated for up to a 500 pound load, with load and span approval from the tent manufacturer. It is essential to have the tent manufacturer approve the load connections for any specific load, tent beam, and span.
